Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

A. Claims 1-11 are drawn to an apparatus of an optical pickup, classified in Class 369, subclass 44.14.

B. Claims 12-22 are drawn to a semiconductor laser unit, classified in Class 369, subclass 121.

Inventions A and B are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the optical pickup apparatus does not require the details of the semiconductor laser unit. The subcombination has separate utility such as with a laser recording unit, laser being used in medical systems, semiconductor laser for measurement etc.. Because these inventions are distinct for the reasons given above and the search required for Group A is not required for Group B, restriction for examination purposes as indicated is proper.

2. **In addition, the Applicants are also required elect species from whichever of the above group they elect. For group A or B**

This groups contains claims directed to the following patentably distinct species of the claimed invention:

The optical recording medium of:

1. figs. 2-6 [first embodiment];
2. figs. 2, 4-6 and 7 [second embodiment, related to second hologram device];

3. figs. 2, 4, 5, **3 or 7** and 8 [third embodiment, related to holder portion].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Mr. Scott Anchell, and John Smith on December 30, 2003; to request an oral election to the above restriction requirement, but did not result in an election being made, as nobody could be contacted.

Art Unit: 2655

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
5. A shortened statutory period for response to this action is set to expire **1 (one) months and 0 (zero) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).
